1. Provide separator size having a pressure drop that does not exceed 0.1 LPS.

2. Valve with larger eccentric (TYP.) XDCR-2 elbow down.

3. Valve NC CV-2 side view.

4. Steam separator seen detail typ.

5. Each heat exchanger, steam control valve station, and pump are sized to meet the peak diversified HWH load.

7. Steam to water heat exchanger P & ID.

8. Control equipment list.

9. Notes:
   - All required components and accessories are not identified.
   - Review steam to water heat exchanger system design guideline.
   - See detail typ.
