

THE UNIVERSITY OF MICHIGAN  
REGENTS COMMUNICATION

ACTION REQUEST

Subject: Pierpont Commons  
Pierpont Commons Renovation Project

Action  
Requested: Approval of Design

Background:

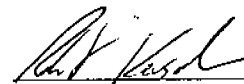

At the October 2000 meeting the Regents approved the Pierpont Commons Renovation Project and the firm of Albert Kahn Associates, Inc. for its design. The project has been estimated to cost \$3.2 million and is intended to improve circulation between the ground and first floor; add a new entry at the north west quadrant; provide for late night food options; add seating and gathering spaces; and combine student service functions. This project will not impact parking on North Campus.

Schematic design has been completed and we are seeking approval for the design of the new vestibule entryway located at the NW corner of the facility. A site plan and rendering of the new design are attached for your review.

We will return to the Regents at a future meeting to finalize the budget and seek approval to issue the project for bids and award a construction contract. Funding will be provided from Central Administration and University Unions.

We recommend the Regents approve the design of the new entry for the Pierpont Commons Renovation Project.

Respectfully submitted,

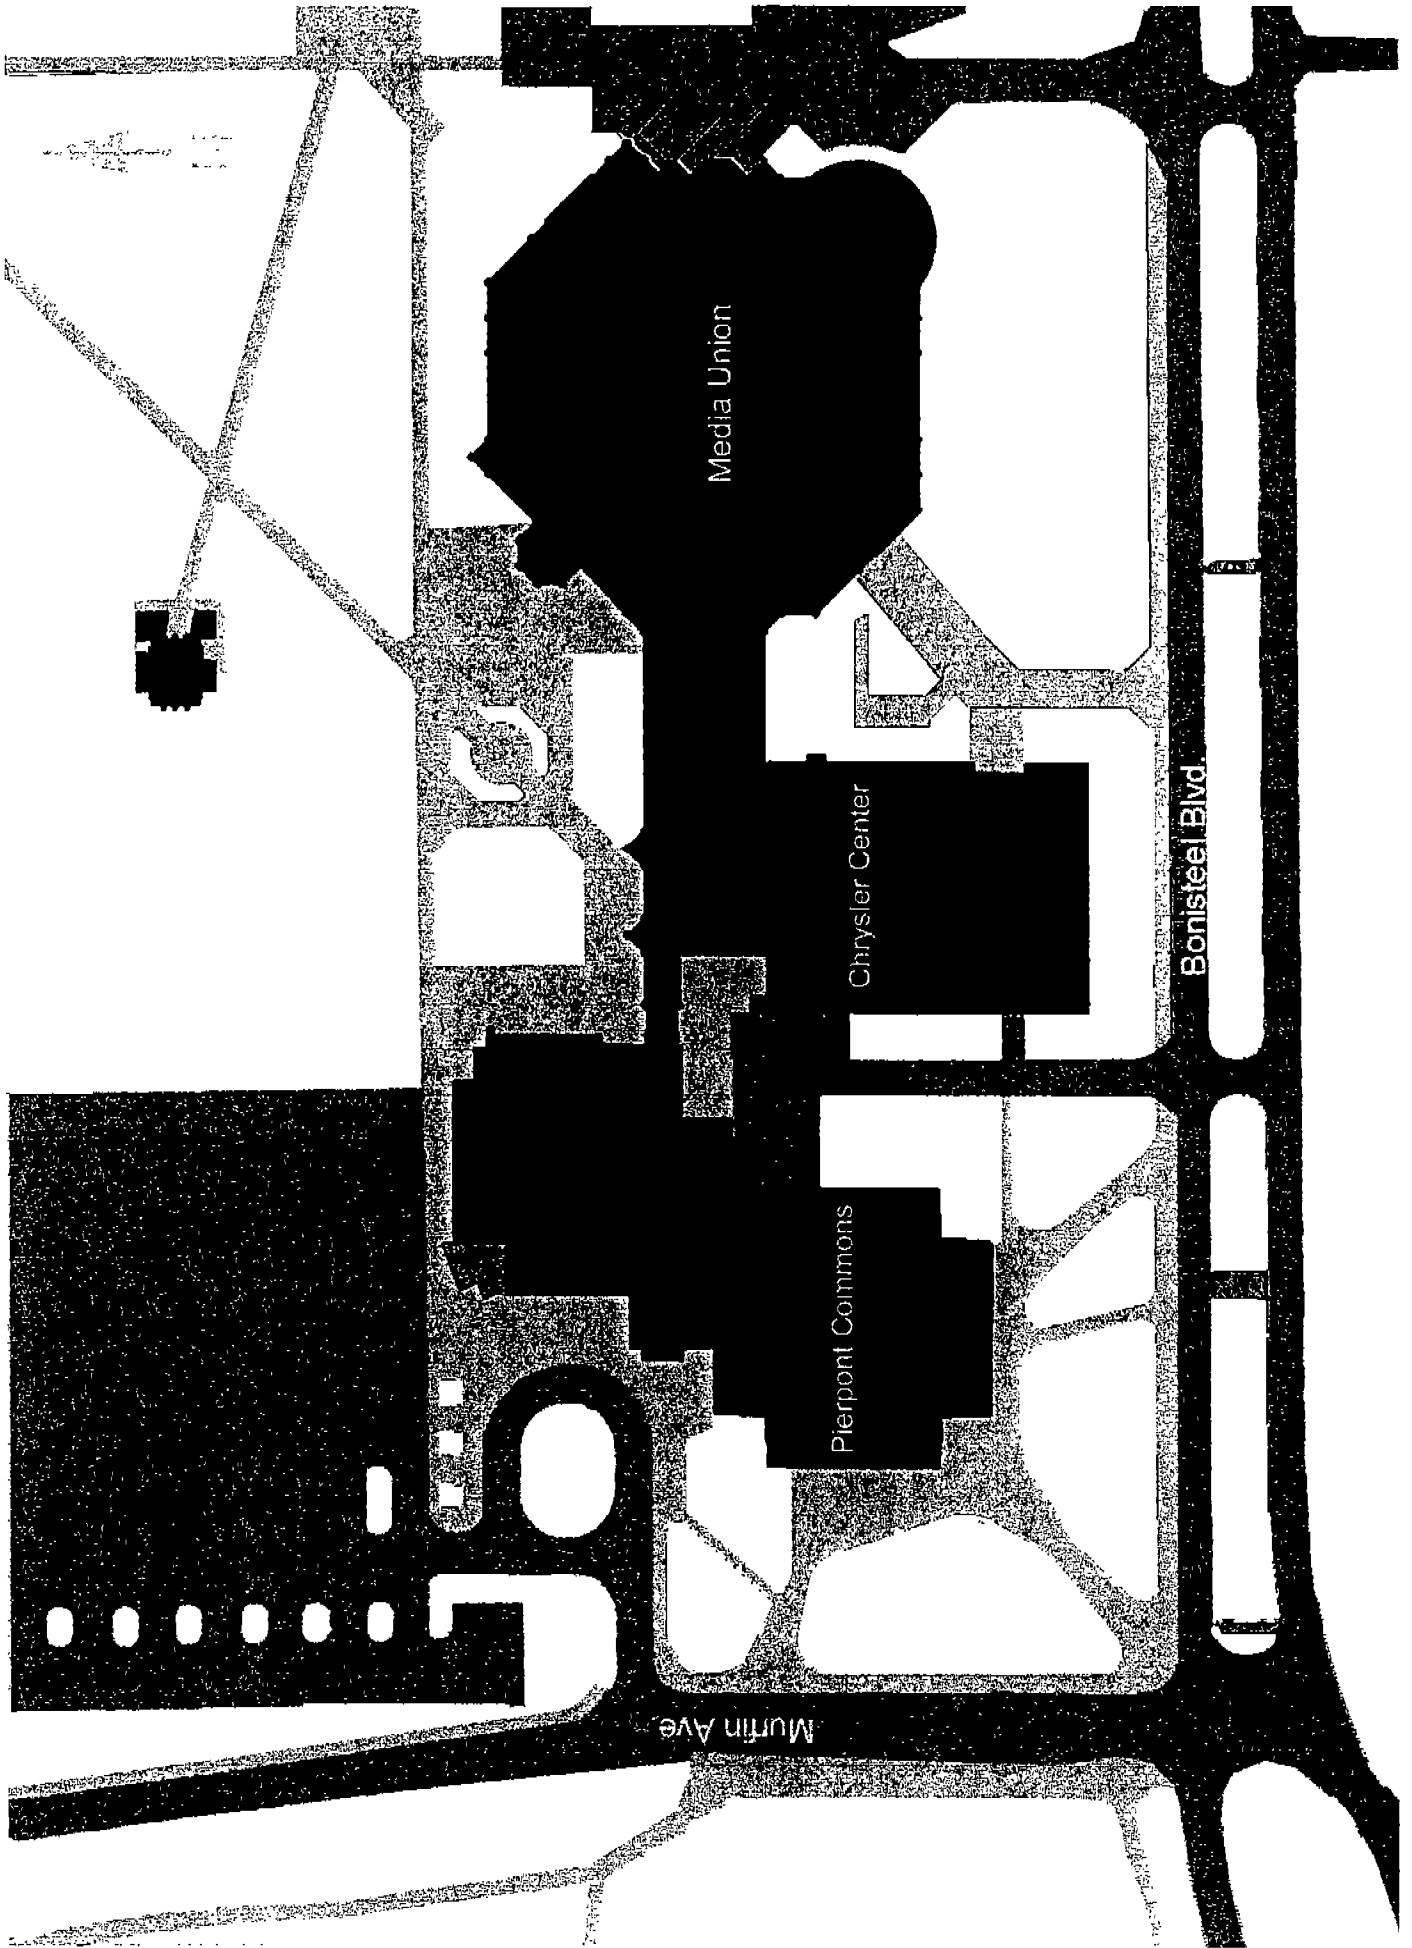

Robert A. Kasdin  
Executive Vice President  
and Chief Executive Officer
