

Yost Ice Arena Seating Replacement and Fan Amenities Improvement

Project Description

This project will replace the spectator seating on the east, south and west sides of the rink, improving accessibility as well as emergency egress. The project also includes improvements to the east and west concourses, conversion of the level four west side media balcony into a series of loge boxes, a new level five on the west side for media, as well as new corner and stair platforms for additional seating. Infrastructure improvements will be made, including upgrading the existing fire alarm system, extending the existing fire suppression system to areas which are not currently protected, and replacing the exterior windows.

Energy Efficiency Measures

- The project will comply with ASHRAE Standards 90.1-2007
- Replacing existing single pane window with high performance glazing system
- Where mechanical units are replaced they will be replaced with high efficiency units

Other Sustainability Features

- We are renovating an existing building instead of tearing it down and/or building a new building
- During construction we will be using best management practices to control sedimentation and erosion

Project Data

- Budget: \$14 M
- Schedule: Completion scheduled for Fall 2012
